

CM50MXA-24S

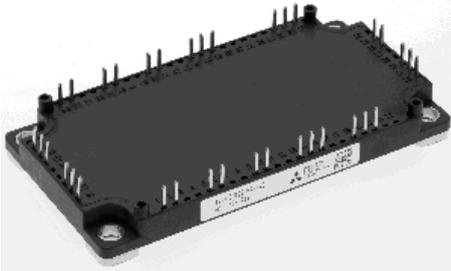

HIGH POWER SWITCHING USE
INSULATED TYPE

CM50MXA-24S

- 6th Generation NX series -

Collector current I_C **50 A**

Collector-emitter voltage V_{CES} **1200 V**

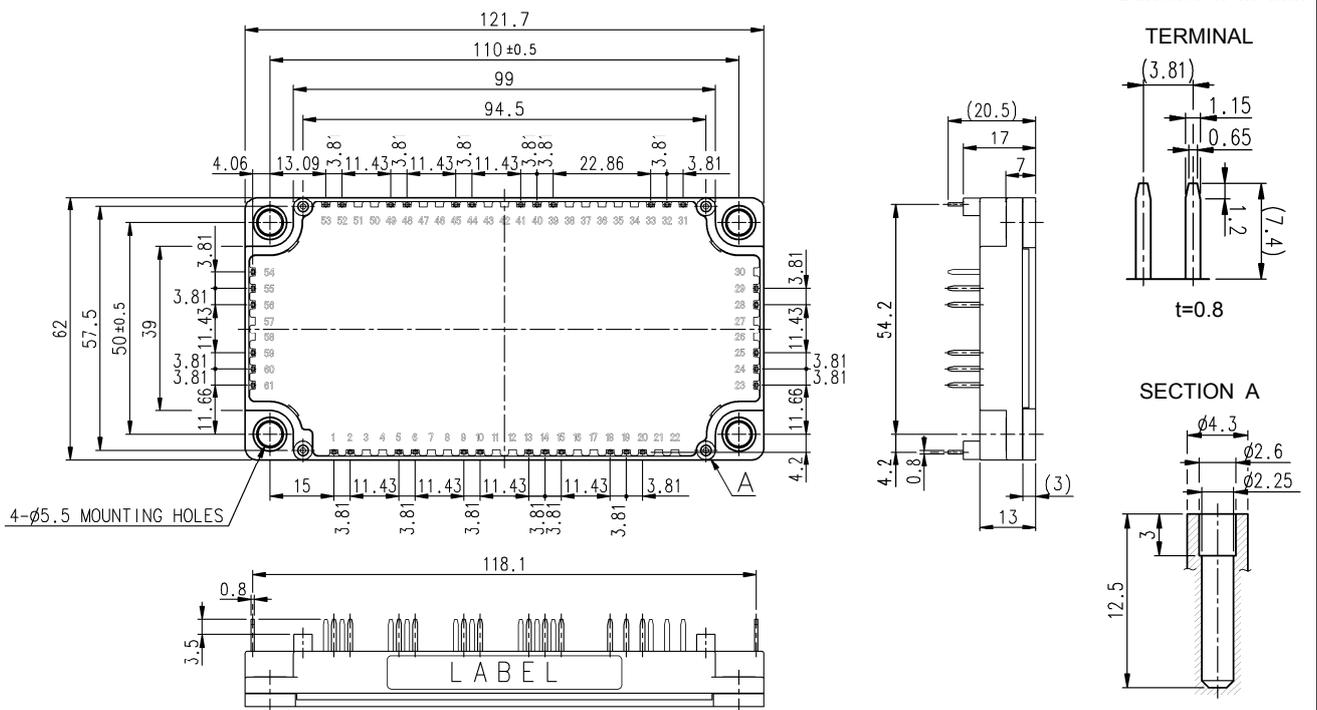

- Flat base Type
- Copper base plate (non-plating)
- Tin plating pin terminals
- RoHS Directive compliant
- UL Recognized under UL1557, File E323585

CIB (Converter+Inverter+BrakeCopper)

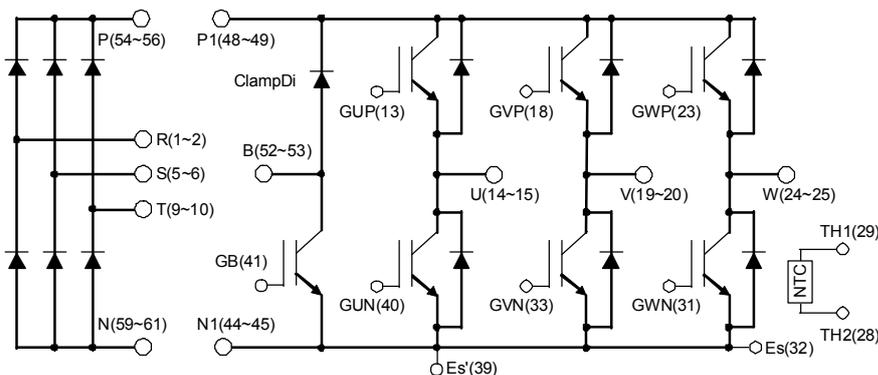

APPLICATION

AC Motor Control, Motion/Servo Control, Power supply, etc.

OUTLINE DRAWING & INTERNAL CONNECTION

INTERNAL CONNECTION

Caution: Each (two or three) pin terminal of P/N/R/S/T/P1/N1/U/V/W/B is connected in the module, but should use all each three pins for the external wiring.

Tolerance otherwise specified

Division of Dimension	Tolerance
0.5 to 3	±0.2
over 3 to 6	±0.3
over 6 to 30	±0.5
over 30 to 120	±0.8
over 120 to 400	±1.2

The tolerance of size between terminals is assumed to be ±0.4.

ABSOLUTE MAXIMUM RATINGS ($T_j=25\text{ }^\circ\text{C}$, unless otherwise specified)**Inverter part IGBT/FWDi**

Symbol	Item	Conditions	Rating	Unit
V_{CES}	Collector-emitter voltage	G-E short-circuited	1200	V
V_{GES}	Gate-emitter voltage	C-E short-circuited	± 20	V
I_C	Collector current	DC, $T_C=125\text{ }^\circ\text{C}$ (Note.2, 4)	50	A

THERMAL RESISTANCE CHARACTERISTICS

Symbol	Item	Conditions	Limits			Unit
			Min.	Typ.	Max.	
$R_{th(j-c)Q}$	Thermal resistance (Note. 2)	Junction to case, per Inverter IGBT	-	-	0.35	K/W
$R_{th(j-c)D}$		Junction to case, per Inverter FWDi	-	-	0.63	
$R_{th(j-c)Q}$		Junction to case, per Brake IGBT	-	-	0.42	K/W
$R_{th(j-c)D}$		Junction to case, per Brake ClampDi	-	-	0.69	
$R_{th(j-c)D}$		Junction to case, per ConvDi	-	-	0.33	
$R_{th(c-s)}$	Contact thermal resistance (Note. 2)	Case to heat sink, per 1 module, Thermal grease applied (Note.8)	-	15	-	K/kW

MITSUBISHI IGBT MODULES
CM50MXA-24S
HIGH POWER SWITCHING USE
INSULATED TYPE

- Note.1: Represent ratings and characteristics of the anti-parallel, emitter-collector free wheeling diode (FWDI).
Note.2: Case temperature (T_c) and heat sink temperature (T_s) are defined on the each surface (mounting side) of base plate and heat sink just under the chips. Refer to the figure of chip location.
Note.3: Pulse width and repetition rate should be such that the device junction temperature (T_j) dose not exceed T_{jmax} rating.
Note.4: Junction temperature (T_j) should not increase beyond T_{jmax} rating.
Note.5: The base plate (mounting side) flatness measurement points (X, Y) are as follows of the following figure.

- Note.6: Pulse width and repetition rate should be such as to cause negligible temperature rise. Refer to the figure of test circuit.
Note.7: $B_{(25/50)} = \ln\left(\frac{R_{25}}{R_{50}}\right) / \left(\frac{1}{T_{25}} - \frac{1}{T_{50}}\right)$,
 R_{25} : resistance at absolute temperature T_{25} [K]; $T_{25}=25$ [°C]+273.15=298.15 [K]
 R_{50} : resistance at absolute temperature T_{50} [K]; $T_{50}=50$ [°C]+273.15=323.15 [K]
Note.8: Typical value is measured by using thermally conductive grease of $\lambda=0.9$ W/(m·K).
Note.9: Japan Electronics and Information Technology Industries Association (JEITA) standards, "EIAJ ED-4701/300: Environmental and endurance test methods for semiconductor devices (Stress test I)"
Note.10: Use the following screws when mounting the printed circuit board (PCB) on the stand offs.
"M2.6×10 or M2.6×12 self tapping screw"
The length of the screw depends on the thickness of the PCB.

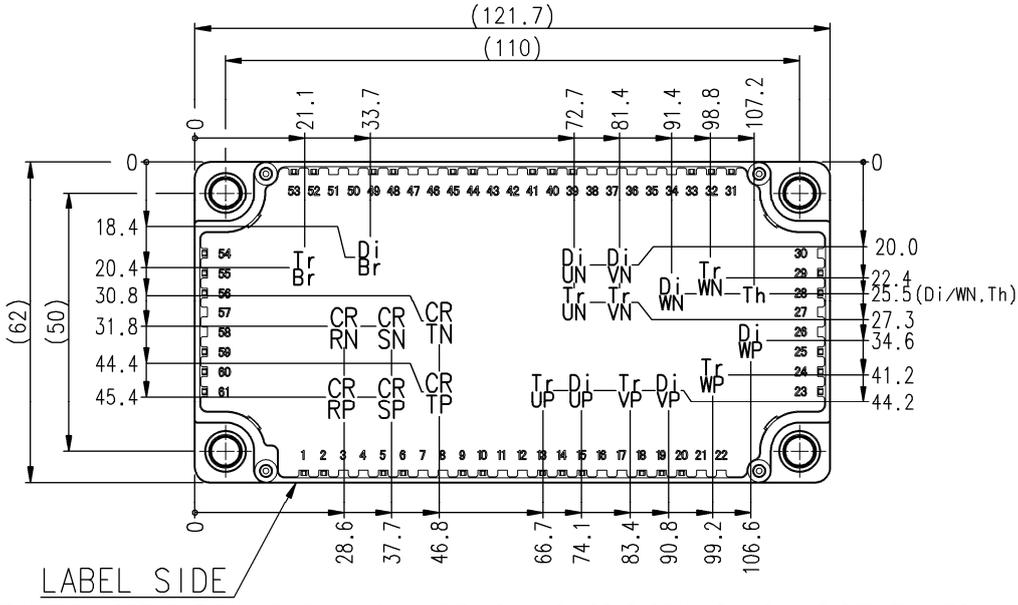

RECOMMENDED OPERATING CONDITIONS ($T_a=25$ °C)

Symbol	Item	Conditions	Limits			Unit	
			Min.	Typ.	Max.		
V_{CC}	DC supply voltage	Applied across P1(P)-N1(N) terminals	-	600	850	V	
V_{GEon}	Gate-emitter drive voltage	Applied across GB-Es/ G*P-*/G*N-Es (*=U,V,W) terminals	13.5	15.0	16.5	V	
R_G	External gate resistance	Per switch	Inverter IGBT	13	-	130	Ω
			Brake IGBT	18	-	180

Keep safety first in your circuit designs!

· Mitsubishi Electric Corporation puts the maximum effort into making semiconductor products better and more reliable, but there is always the possibility that trouble may occur with them. Trouble with semiconductors may lead to personal injury, fire or property damage.

Remember to give due consideration to safety when making your circuit designs, with appropriate measures such as (i) placement of substitutive, auxiliary circuits, (ii) use of non-flammable material or (iii) prevention against any malfunction or mishap.

Notes regarding these materials

- These materials are intended as a reference to assist our customers in the selection of the Mitsubishi semiconductor product best suited to the customer's application; they do not convey any license under any intellectual property rights, or any other rights, belonging to Mitsubishi Electric Corporation or a third party.
- Mitsubishi Electric Corporation assumes no responsibility for any damage, or infringement of any third-party's rights, originating in the use of any product data, diagrams, charts, programs, algorithms, or circuit application examples contained in these materials.
- All information contained in these materials, including product data, diagrams, charts, programs and algorithms represents information on products at the time of publication of these materials, and are subject to change by Mitsubishi Electric Corporation without notice due to product improvements or other reasons. It is therefore recommended that customers contact Mitsubishi Electric Corporation or an authorized Mitsubishi Semiconductor product distributor for the latest product information before purchasing a product listed herein. The information described here may contain technical inaccuracies or typographical errors. Mitsubishi Electric Corporation assumes no responsibility for any damage, liability, or other loss rising from these inaccuracies or errors. Please also pay attention to information published by Mitsubishi Electric Corporation by various means, including the Mitsubishi Semiconductor home page (<http://www.mitsubishichips.com/Global/index.html>).
- When using any or all of the information contained in these materials, including product data, diagrams, charts, programs, and algorithms, please be sure to evaluate all information as a total system before making a final decision on the applicability of the information and products. Mitsubishi Electric Corporation assumes no responsibility for any damage, liability or other loss resulting from the information contained herein.
- Mitsubishi Electric Corporation semiconductors are not designed or manufactured for use in a device or system that is used under circumstances in which human life is potentially at stake. Please contact Mitsubishi Electric Corporation or an authorized Mitsubishi Semiconductor product distributor when considering the use of a product contained herein for any specific purposes, such as apparatus or systems for transportation, vehicular, medical, aerospace, nuclear, or undersea repeater use.
- The prior written approval of Mitsubishi Electric Corporation is necessary to reprint or reproduce in whole or in part these materials.
- If these products or technologies are subject to the Japanese export control restrictions, they must be exported under a license from the Japanese government and cannot be imported into a country other than the approved destination. Any diversion or reexport contrary to the export control laws and regulations of Japan and/or the country of destination is prohibited.
- Please contact Mitsubishi Electric Corporation or an authorized Mitsubishi Semiconductor product distributor for further details on these materials or the products contained therein.
